Parking ticket machine Citea
The tailor-made solution for on-street parking space management

Due to its high degree of modularity, personalised solutions can be implemented from the most important core components such as a payment system, energy supply and networked communication. Citea with solar panel allows for energy-saving operation. Parking fees can easily be paid in cash or with your debit card. Your own full colour scheme and personalised advertisement options perfectly round of the service offer.

Technical data:

Dimensions	H 1595 x W 405 x D 311 mm
Weight	approx. 80 kg, depending on configuration
